SUMMARY

Results-driven Flutter Developer with 2+ years of experience building and delivering production-ready iOS and Android applications using Flutter and Dart. Experienced in end-to-end mobile development, including translating Figma designs into responsive interfaces, implementing Clean Architecture, integrating backend services, testing, debugging, and automating CI/CD pipelines. Proficient in GetX, RESTful APIs, gRPC, Hive (offline-first), and Firebase. Combines strong analytical problem-solving abilities and effective cross-functional communication with a focus on application security, performance optimization, and privacy-conscious data architecture to build scalable applications and seamless user experiences.

TECHNICAL SKILLS

- **Languages & Frameworks** : Dart, Flutter
- **State Management** : GetX, Provider, BLoC/Cubit, Riverpod
- **Databases** : MySQL, PostgreSQL, Firebase, Hive
- **Backend & APIs** : RESTful APIs, GraphQL, gRPC, Firebase, Supabase, Google Cloud Platform (GCP)
- **DevOps & Tools** : Git, GitLab, GitHub, Android Studio, Xcode, Figma, CI/CD Pipelines, FlutterFlow

WORK EXPERIENCE

Flutter Developer Nov 2025 – Aug 2026
Tesseriq Remote

- Built the Flutter application from the ground up as the sole frontend developer, taking ownership of the complete development lifecycle from Figma-driven UI implementation and architecture design to API integration, testing, debugging, performance optimization, and Android/iOS production releases.
- Optimized API communication, widget rendering, and GetX state management, improving application performance by 25% and enhancing UI responsiveness. Implemented offline-first data persistence using Hive to ensure reliable local data access.

Software Developer Aug 2024 – Aug 2025
Spin Info Solutions Private Limited Pondicherry, India

- Delivered and maintained client-facing Flutter applications, integrating **REST APIs, payment gateways, push notifications, and reusable UI components**; reduced development effort by **30%** through modular architecture and component reuse.
- Collaborated with designers, backend engineers, and product teams during Agile sprints to translate Figma designs into production-ready Flutter interfaces, integrate backend services, participate in code reviews, and manage feature delivery using GitLab and Jira.

Software Developer Intern Mar 2024 – July 2024
Spin Info Solutions Private Limited Pondicherry, India

- Developed Flutter features, integrated REST APIs, resolved production bugs, and supported Android and iOS releases, contributing to improved application stability and reliability.
- Collaborated with senior developers on reusable UI components, code reviews, debugging, and performance optimization within Agile development workflows.

PROJECTS

Tesseriq — Logistics Management Platform Tech Stack: Flutter, Dart, Figma, gRPC, GetX, GitHub, Hive

- Developed logistics workflows for **driver and load-owner management, trip lifecycle tracking, and financial reconciliation** across Android and iOS.
- implemented an **offline-first data layer with Hive**, enabling reliable access to locally persisted data during network interruptions and facilitating synchronization with backend services.
- Integrated gRPC-based backend services into a modular Flutter architecture, using reusable UI components to improve maintainability and support scalable feature development.

MĀLIYAH — Personal Finance & Wealth Management App Tech Stack: Flutter, Dart, BLoC/Cubit, ML Kit, Firebase, DDD

- implemented on-device receipt and UPI screenshot OCR using Google ML Kit to automatically extract transaction details without sending sensitive financial images to external servers.
- Developed comprehensive financial management workflows, including expense tracking, Khata (debt management), EMI and subscription tracking, dynamic budgeting, and interactive wealth analytics.
- Designed a reusable Material 3 interface with interactive financial visualizations and light and dark themes. Implemented a modular architecture focused on maintainability, privacy, and performance.

EDUCATION

Sri Venkateshwara College of Engineering and Technology Sep 2019 - Aug 2023
Bachelor of Technology (B. Tech.), Computer Science and Engineering CGPA - 8.5
